2026 Capital Gain Estimates

All mutual funds must distribute to shareholders any net realized gains from the sale of individual securities in their portfolio. As a service to our shareholders, Praxis Funds is communicating year-to-date realized capital gains for all of our mutual funds. Our communication includes each Fund's / Portfolio's total per share factor of short term and long term realized gains and the total of these two figures as a percent of each Fund's net assets.

The 2026 capital gain estimates provided below are as of October 31, 2026. Please note that the capital gain figures presented are estimates as certain tax adjustments, such as post 30-day wash sales, are still unknown. These estimates are subject to change and can change by a significant amount. Distributions, whether reinvested or not, will be subject to federal and possible state income tax unless shares are held in a tax-free or tax-deferred retirement account. The per-share amount of the undistributed realized gain will be identical for all share classes.
