## Fund information

### Objective

To seek capital appreciation.

### Strategy

The Fund:

- Features a portfolio of equity securities intended to reflect the performance of the U.S. small capitalization equities market.
- Uses "indexing" techniques to approximate the performance of the CRSP US Small Cap Index, while incorporating stewardship investing criteria.
- Attempts to minimize risk through diversification.

### Risks

The Fund is also subject to small capitalization company risk. Small capitalization companies may not have the size, resources or other assets of large capitalization companies. These small capitalization companies may be more vulnerable to economic, market and competitive pressures than larger companies and therefore may respond differently to market events, and may be subject to greater market risks and fluctuations in value than larger companies. In addition, application of screens may cause the Fund to vary from the performance of its index and other small cap funds.

### Account minimums:

- I Shares – \$100,000 for individual funds.
- A Shares – \$2,500 for individual funds<sup>4</sup>.
- Auto investing – \$100 per month.

### Portfolio profile

Price/Earnings ratio forward	17.9x
Beta	0.99
Turnover Ratio	82.3%

Price/Earnings ratio (P/E) is the price of a stock divided by its earnings per share. It gives investors an idea of how much they are paying for a company's earning power. The higher the P/E, the more investors are paying, and the more earnings growth they are expecting.

Beta rating attempts to measure relative risk. A beta rating of higher than one indicates greater relative volatility than the market. A beta rating lower than one indicates lower volatility than the market, as defined by the CRSP US Small Cap Index.

Turnover ratio is the percentage of a fund's holdings that have been replaced in the last year.
